SUMMARY

Software developer with 2+ years of full-stack experience building web applications using Python, Django, Vue.js, React, and Node.js. Experienced in automating workflows, integrating AI tools, and maintaining CI/CD pipelines. Proven collaborator with a passion for clean, maintainable code, mentorship, and user-focused design.

EDUCATION

Bachelor of Science in Computer Science
Kansas State University

Aug 2018 - Dec 2022
Manhattan, Kansas

EXPERIENCE

Application Developer
Aprio

Jan 2026 - Present
Topeka, Kansas

Software Engineer (Volunteer)
Rescue River

Mar 2025 - Nov 2025
Kampala, Uganda

- Built a full-stack Node/Express.js and React app with an intuitive interface that made scraper management and data automation accessible to non-technical users.
- Developed a Playwright scraper to collect sales and marketing data from 100+ Google Maps listings per run, with location targeting and structured Excel exports.
- Engineered a fishing report aggregator with Excel input, Playwright scraping, and AI summarization, reducing hours of manual gathering into minutes.
- Developed a comparison utility to align scraper outputs and inputs, closing data gaps.
- Authored setup and usage docs to streamline on-boarding and maintenance.

Software Engineer
Canopy

Feb 2023 - Jan 2025
Manhattan, Kansas

- Helped design, build, and maintain a multi-sheet Excel import feature in Django/Python, simplifying bulk data entry and automating manual workflows.
- Diagnosed and optimized SQL queries and API responses, achieving sub-second average page load times.
- Collaborated with product managers and client success teams to refine workflows and resolve critical bugs, improving overall user experience.
- Engaged in weekly peer code reviews and provided constructive feedback, strengthening overall code quality and accelerating feature delivery.
- Mentored a student developer through weekly code reviews and pair programming, supporting their growth as a software engineer and professional.
